SACCHARINE FOOD

INVENTOR: ENDO AKIRA

APPL-NO: 58186305

FILED-DATE: October 5, 1983

ASSIGNEE-AT-ISSUE: ENDO AKIRA

PUB-TYPE: June 30, 1984 - Un-examined patent application (A)

PUB-COUNTRY: Japan (JP)

REL-DATA:

Division of Ser. No. JP56033513

IPC-MAIN-CL: A 23L001#0

ENGLISH-ABST:

PURPOSE: To prepare a saccharine food free of the property to increase tetrose, by adding saccharides selected from hardly digestible polysaccharides produced by microorganisms, e.g. glucans, and their derivatives to a saccharine feed having the property to increase tetrose level.

CONSTITUTION: A saccharine food increasing tetrose level is added with a saccharide selected from hardly digestible polysaccharides produced by microorganisms and their derivatives. The hardly digestible saccharide is, e.g. dextran, curdlan, phosphomannan, etc., preferably glucan having alpha-1,6 bond. The derivative of the polysaccharide is, e.g. sulfuric acid ester, phosphoric acid ester, carboxymethyl ether derivative, etc.
